

Collaborative Wisdom, Inc.

The Collaborative Wisdom CMS is the best choice for your insurance business website. We have tens of thousands of agent accounts, through their brokerages, active on our system today. Why? The Collaborative Wisdom CMS is the only website management system with seamless single sign-on modules with ALL of these providers:

- AgencyWorks
- EZData Smart Office
- BISG
- Kaplan Efficient Forms
- Ebix WinFlex Web
- iPipeline iGo

The secure hosting facility where your website will be housed is SAS 70 Type II Certified, with 24 x 7 x 365 NOC and Security personnel onsite.

To ease your process for setting up your website, we have developed three basic packages for your insurance clients: Basic Website, Standard Insurance, and Complete Insurance. If your website does not need everything in the Complete package, you'll still be able to add those modules in the future without requiring expensive development costs!

Insurance Packages

Module	Basic Website	Standard Insurance	Complete Insurance
